

# BIORECLAIM Compost

One stop solution for solid waste  
management

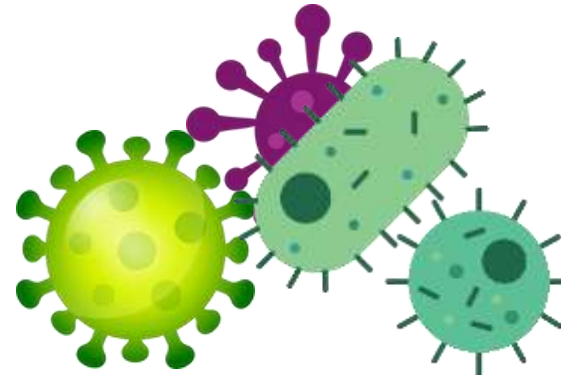

**Promoting circular economies through nature based solutions!**

# Problems due to improper treatment of solid waste

Excessive Odor

Risk to Human Health

Slow composting process

Environmental Impact  
due to improper  
treatment & leachate

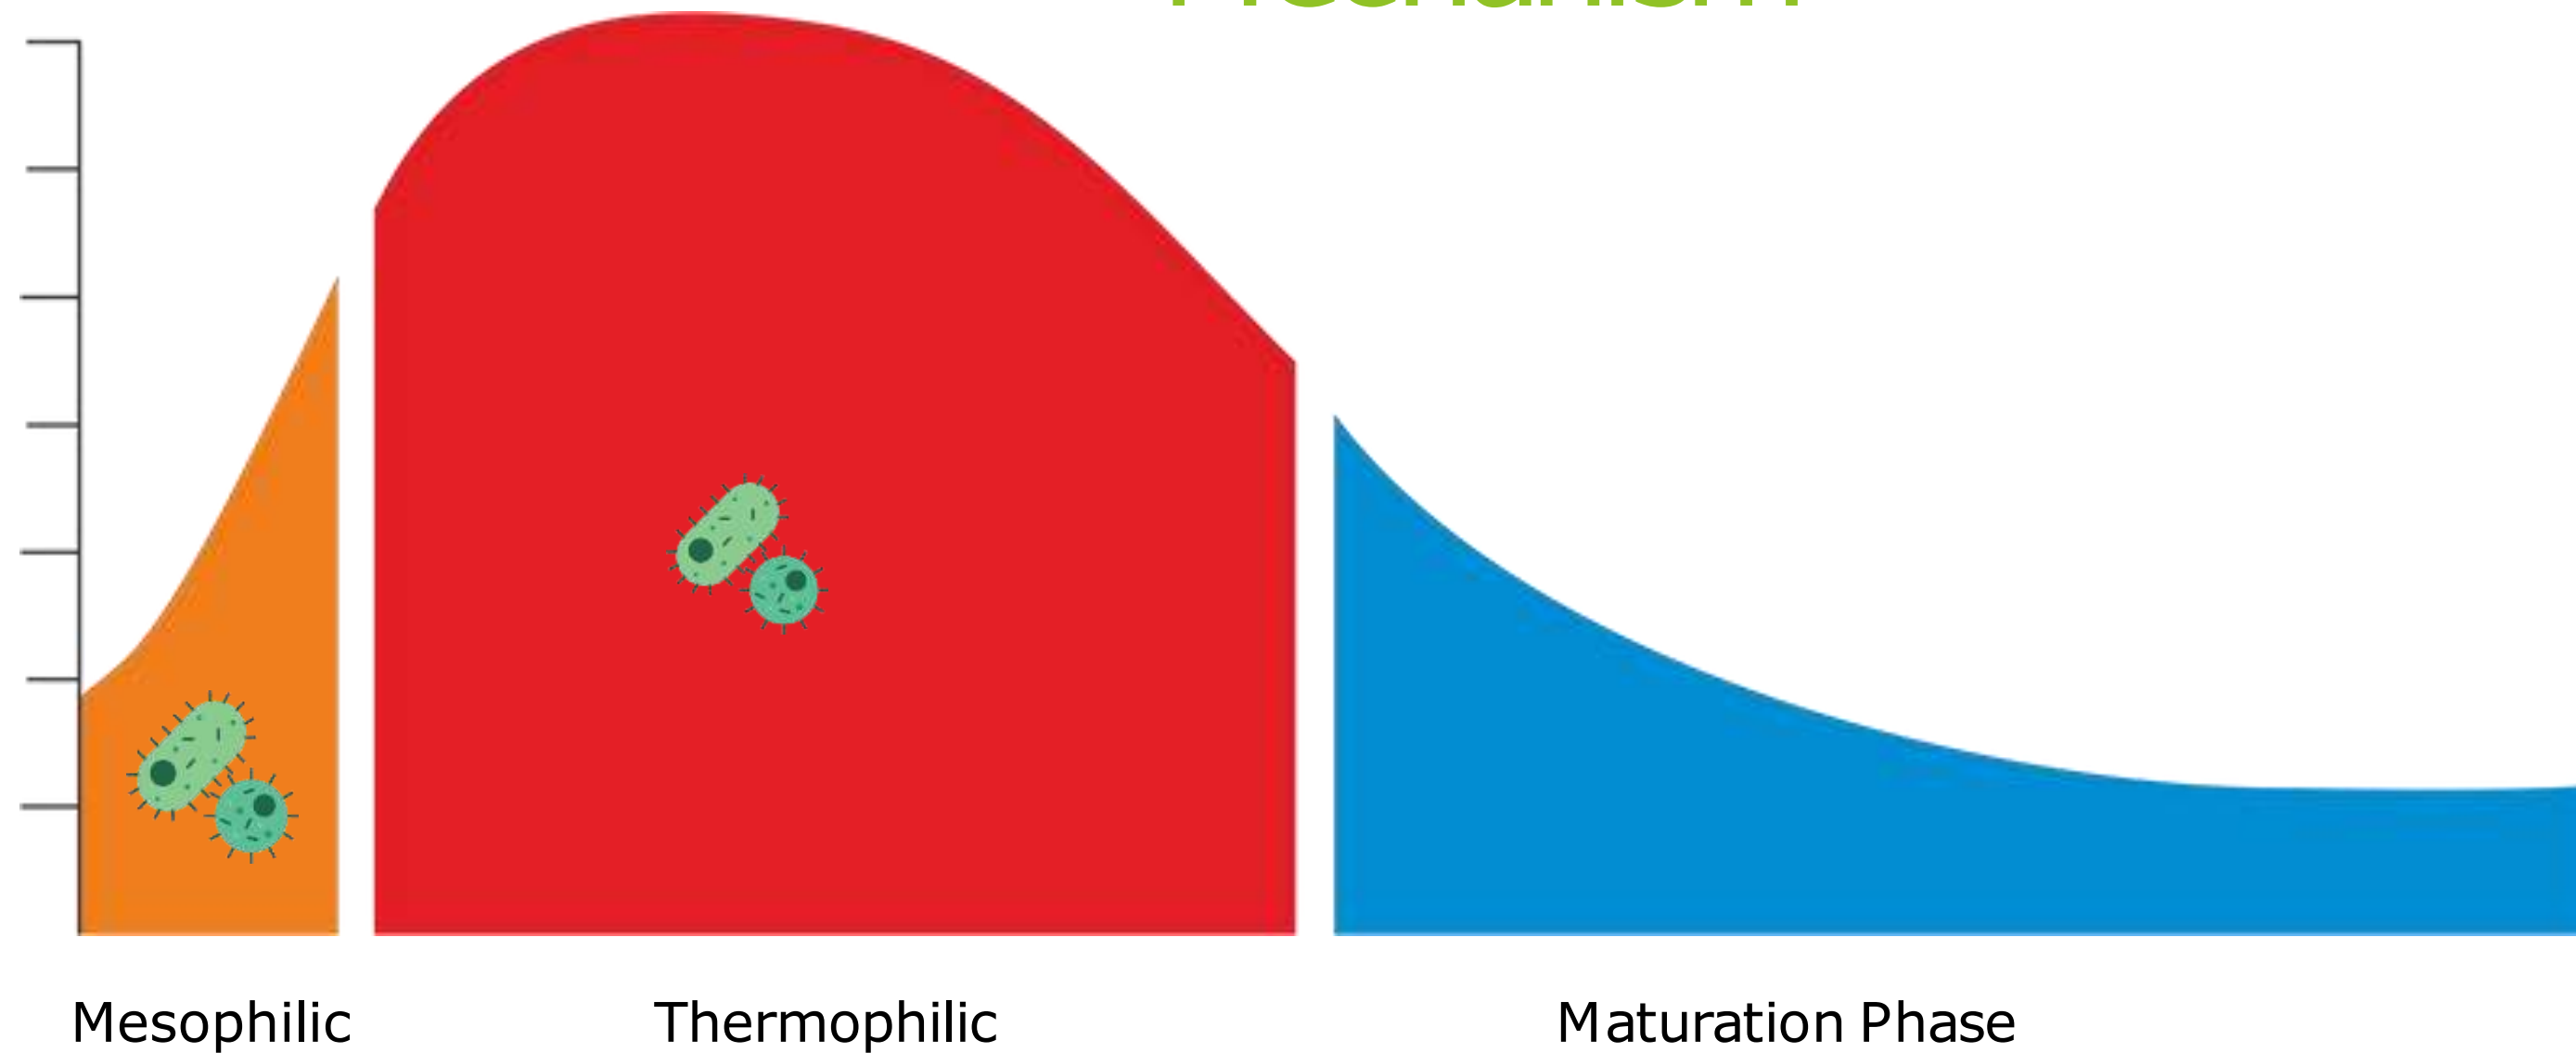

**BIORECLAIM**Compost

**BioReclaim *Compost*** is a unique bio-formulation that:

- Reduces odor by **up to 95%**
- Promotes faster composting by up to **70%** depending on waste type.
- ***Cost-effective*** solution & versatile application. Costs under **USD\$0.6/Ton** of waste.
- Limits fecal coliform & promotes hygiene.

# Mechanism

Up to 70% faster composting 

 Improved C:N Ratio

 Prevents formation of hydrogen sulfide

# Dosage

**Note:** Please share relevant information regarding waste quantity with our technical experts before your purchase

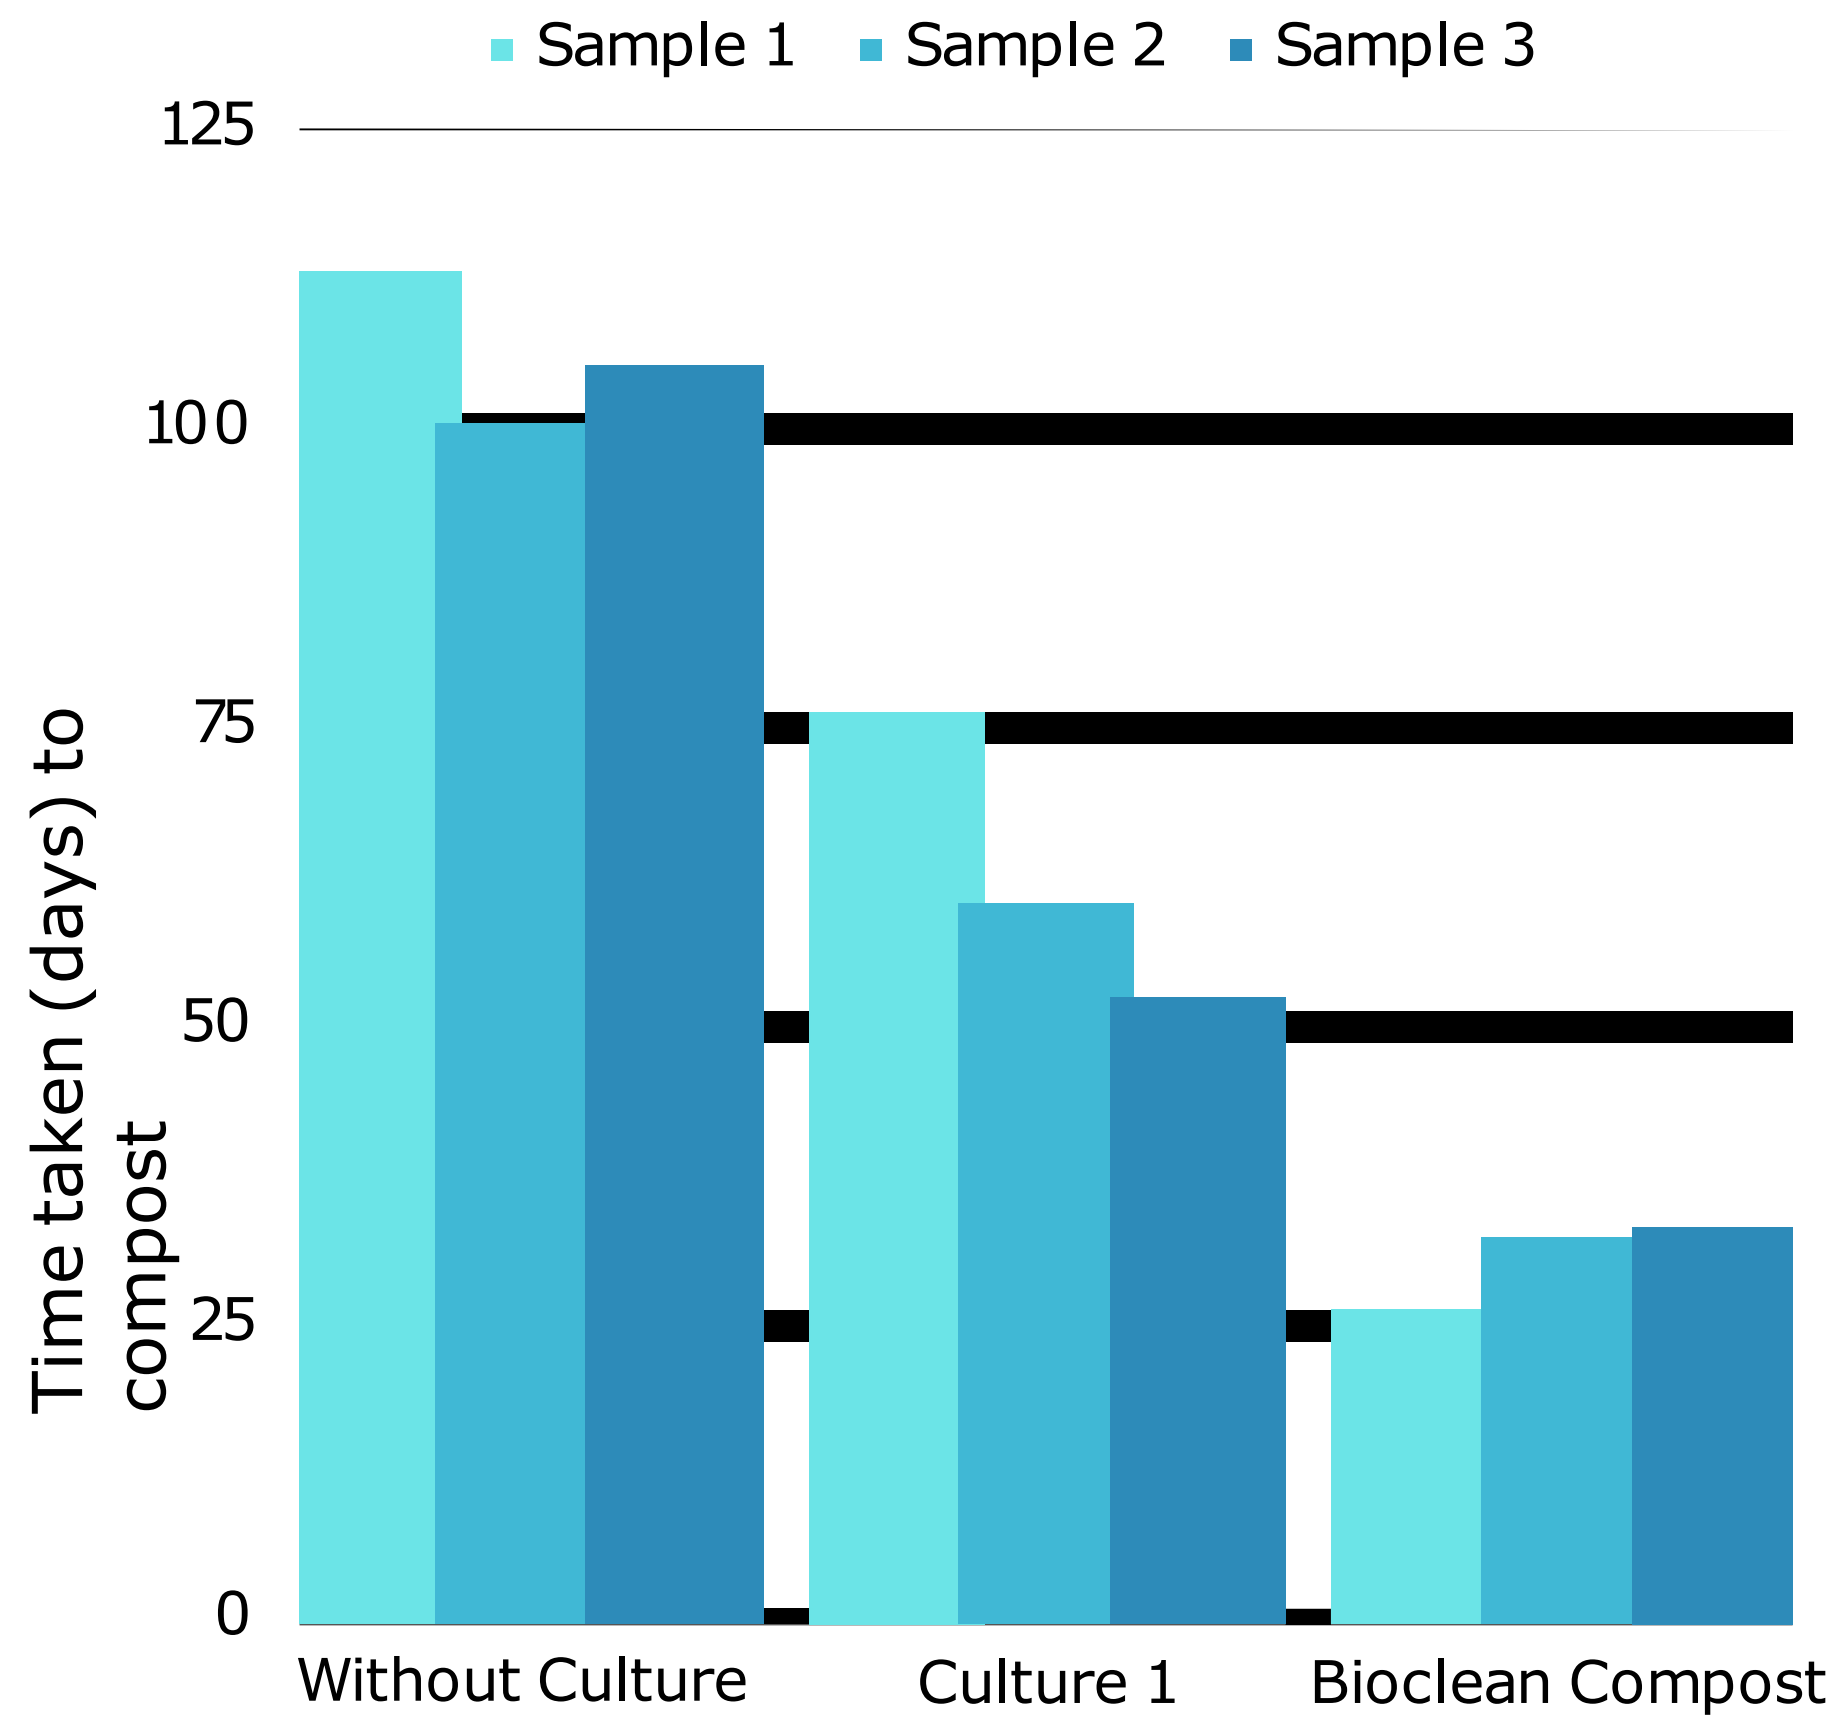

Add **1KG of product *per* tonne** of compostable material. Add to an appropriate volume of water, mix well before applying to compostable material via *spraying* or *direct addition*.

Ensure ‘aerobic’ conditions, mixing and **follow general guidelines for composting.**

# Study 1: Municipal Solid Waste Composting, Mumbai India

## Results:

66% faster composting compared to generic cultures

End product suitable for use as bio-fertilizer

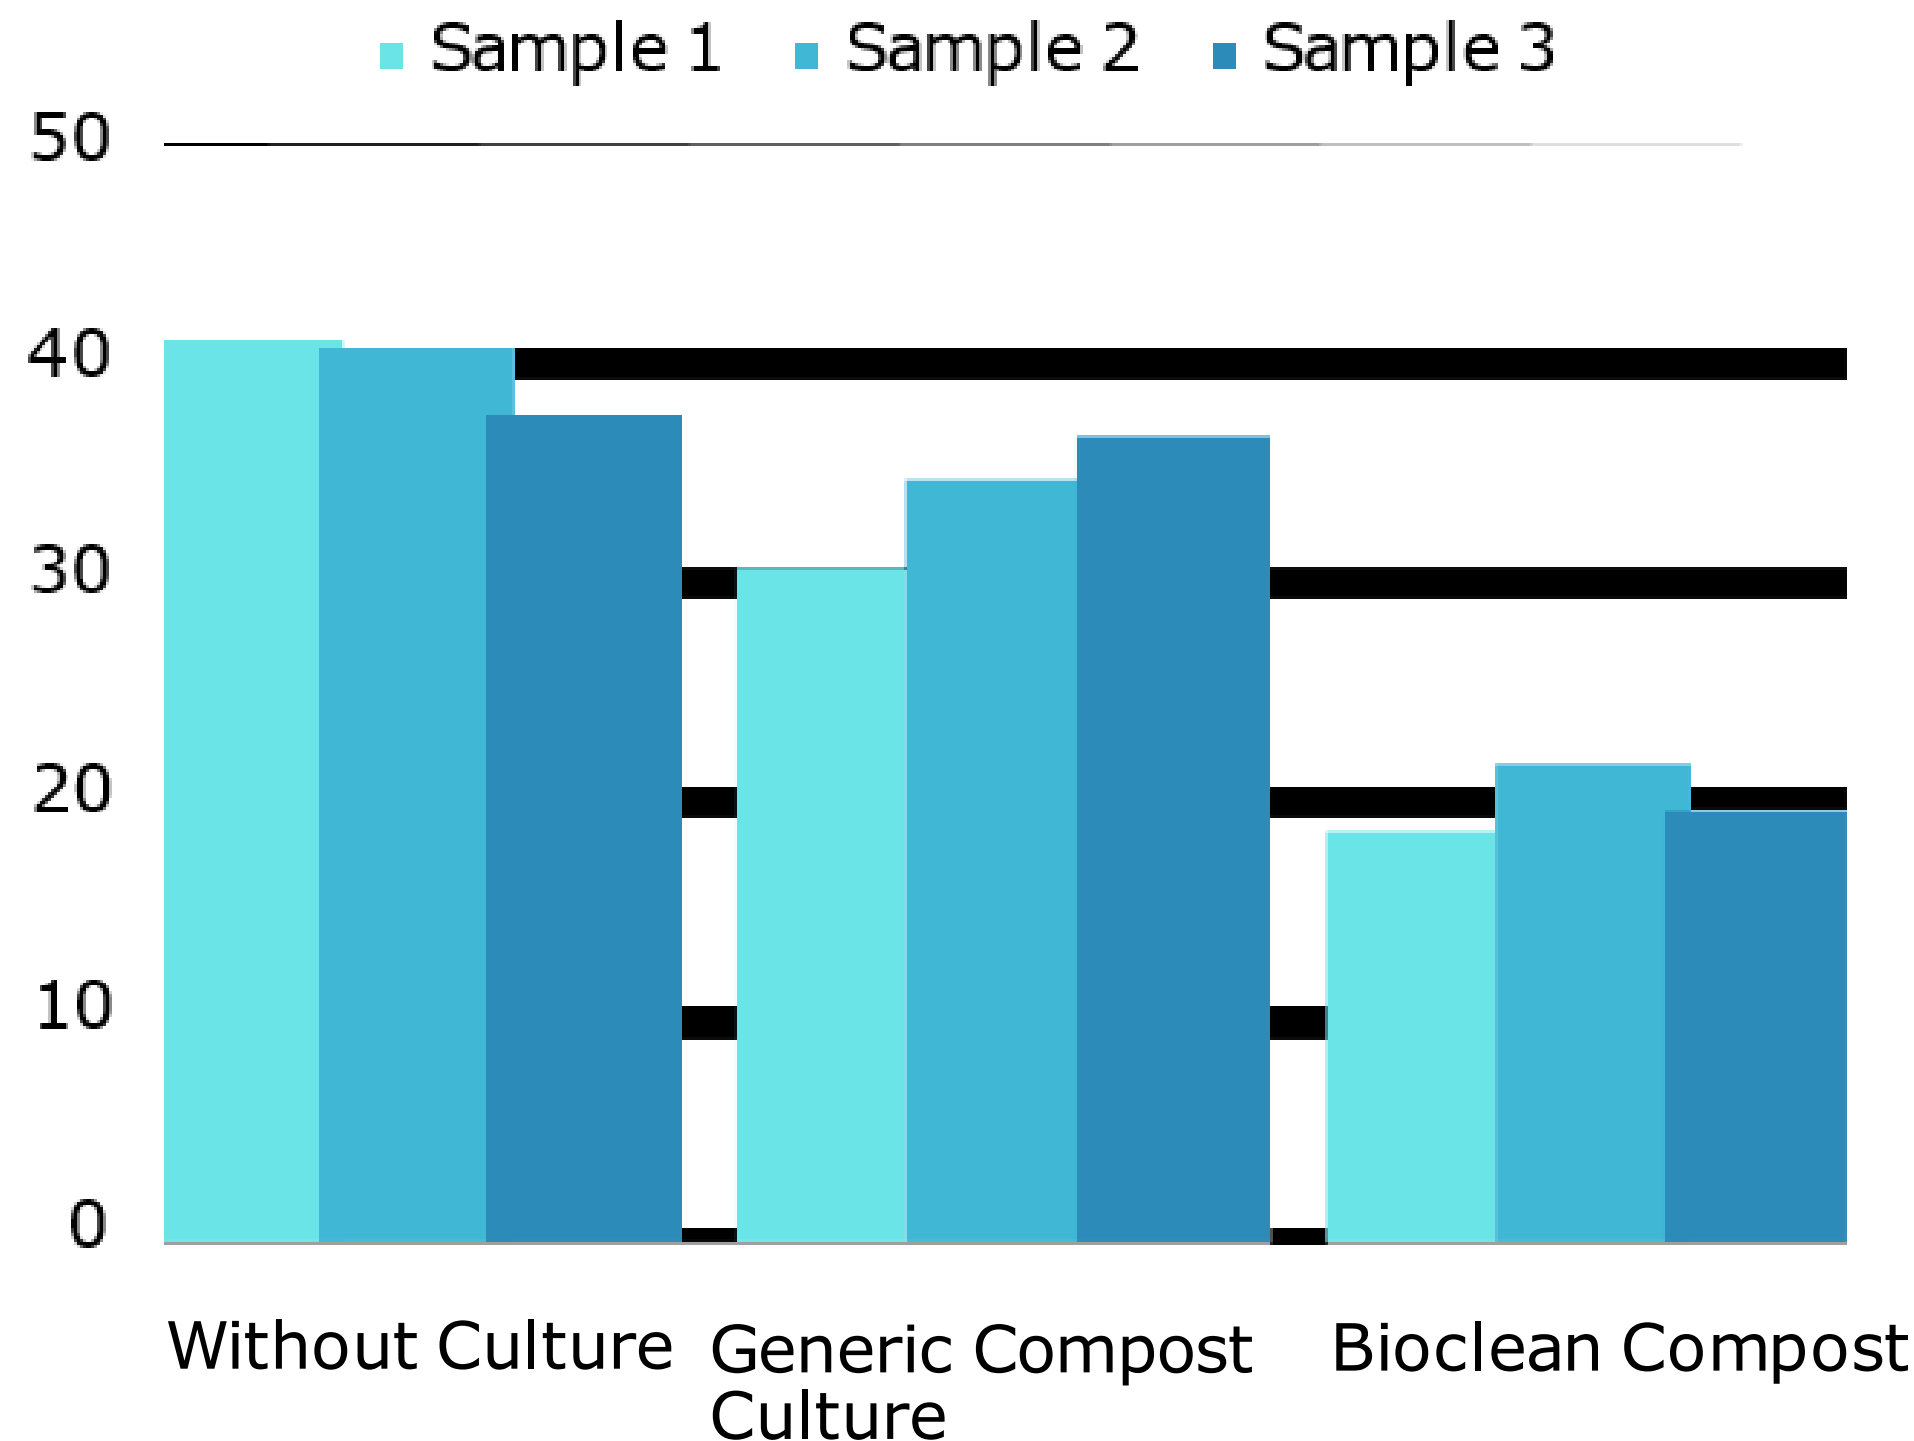

Odor-free end product

Upto 40% more cost-savings

# Study 2: Paper Effluent Sludge Composting

## Results

- ▶ Up to 50% faster composting compared to generic cultures
- ▶ End product suitable for use as bio-fertilizer
- ▶ Odor-free end product
- ▶ Up to 63% more cost-savings
